Java

```java
class Solution {
    public String[] reorderLogFiles(String[] logs) {

    }
}
```

JavaScript

```javascript
/**
 * @param {string[]} logs
 * @return {string[]}
 */
var reorderLogFiles = function(logs) {

};
```

TypeScript

```typescript
function reorderLogFiles(logs: string[]): string[] {

};
```

C++

```cpp
class Solution {
public:
```

```cpp
    vector<string> reorderLogFiles(vector<string>& logs) {

    }
};
```

C#

```csharp
public class Solution {
    public string[] ReorderLogFiles(string[] logs) {

    }
}
```

Kotlin

```kotlin
class Solution {
    fun reorderLogFiles(logs: Array<String>): Array<String> {

    }
}
```

Go

```go
func reorderLogFiles(logs []string) []string {

}
```
